

windream and Konica Minolta together at CeBIT 2010

New products and solutions in hall 3, stand no. J 20

Langenhagen/ Bochum – Konica Minolta and windream will again present their products together at the CeBIT IT- fair. Interested visitors who want to learn more about new products and solutions of the two hard- and software manufacturers will find the windream partner stand in the new ECM-area of the CeBIT in hall 3, stand no. J 20.

The corporate exhibition program at the CeBIT 2010 from March 2 to 6 will primarily put the interaction between Konica Minolta systems and the enterprise content management system windream into focus. In this context, the two exhibitors will show visitors new options of IT-supported information capture, administration and archiving.

Especially the interaction of the hard- and software systems of both suppliers is of special interest. E.g., it is possible to capture and digitise incoming paper documents quickly and efficiently at a Konica Minolta system. On the other hand, users can also index and archive the documents quickly and securely in the windream ECM-system and in one workstep only. These automatised processes will be presented to the visitors "live at Hannover".

The exhibition program will be completed by a wide range of individual solutions for the windream ECM-system which have been developed by our partners and co-exhibitors. The

windream stand occupies an area of more than 240 square meters.

The Konica Minolta and windream products which are presented at the CeBIT, but also on other fairs and exhibitions, are the result of a long-term and close partnership of the two companies, which has meanwhile been existing for more than 8 years now.

About windream GmbH

windream GmbH develops and distributes the windream ECM-system. windream GmbH currently employs about 50 people who are involved in development, partner and customer support, distribution and marketing. The company supports a network of about 250 distribution, integration and cooperation partners throughout Europe, the USA, South America as well as Australia and New Zealand. International enterprises such as John Deere, Bayer AG, Deutz AG, Dürr AG and König & Bauer are included among the company's customers.

About the windream Enterprise Content Management System

windream, protected by worldwide patent since 2003, is counted amongst the leading solutions for acquiring, administering and archiving electronic documents in the office sector as well as in the field of SAP-integrated applications. windream is the first ECM-system anywhere which is completely integrated into the Windows Operating System.

The Standard Edition is generally used by smaller and medium-sized companies and the Business Edition by large enterprises. A whole variety of integrations extend the windream product portfolio. Integrations into ERP-, financial accounting, knowledge management, groupware and imaging / data capturing solutions as well as integrations into different branch-specific software systems are included among the product range. windream has achieved a first-class result as a participant in the BARC studies "Enterprise Content Management" in all test disciplines.
