

**Press Release of  
August 27, 2010**

**windream GmbH at the DMS EXPO 2010 (hall 7, stand no. B 11):**

## **Enterprise Content Management with windream 5.0**

**Bochum. – windream GmbH will focus its activities at this year's DMS EXPO from October 26 to 28 in Stuttgart on the new windream version 5.0. The supplier of the Enterprise Content Management System windream will, just like in former years at Cologne, attend the fair with a partner stand. This year, the fair will take place at the new exhibition center in Stuttgart.**

The exhibitions of windream GmbH will be completed by hardware and software solutions which enhance the windream ECM-system by new and interesting features and which have been developed by the windream co-exhibitors.

### **windream 5.0 and further ECM-solutions**

In comparison with the previous version 4.5, the new windream version 5.0 provides a whole variety of new functions which have also been adjusted visually. Thus, e.g. the windream 5.0 retrieval application and the document viewer named "windream DocView" will occur in a completely redesigned layout with new functions.

Further new features, which have partly been shown on the last CeBIT already, are the windream Virtual Folders with a dynamic generation of individual sights of the document volumes of a windream ECM-system, the complete 64 Bit support also in mixed mode with 32 Bit clients, the user-specific recycle bin for documents

which have been deleted from a windream system, and the windream records viewer which can be configured individually.

Further on, the windream version 5.0 also provides other features: Automatic check for duplicates (single instancing), scalable document properties, configuration of an auto-completion mode for input fields, different labels for the same index fields of the windream-specific object types, extension of the maximum length of strings in string fields to 4 kilobytes, a wizard for the windream server configuration and many other features.

Besides windream 5.0, windream GmbH will also present the current version of its e-mail archiving solution windream Exchange and the new web client of the business process management system named windream BPM.

### **Positive Expectations**

Basically, windream GmbH has a positive opinion on the movement of the DMS EXPO from Cologne to Stuttgart and on the fact that two fairs - DMS EXPO and the IT & Business - will take place at the same time. Roger David, Managing Director of windream GmbH: "As we are always open for innovations, we have some expectations concerning this short-term and also surprising decision. We can see a strong "double pack" in the two parallel events of DMS EXPO and IT & Business in the south of Germany and a consolidation of our DMS EXPO fair. Finally, our performances at the CeBIT have also shown that there are great synergies between the different IT topics. Especially the segments of ECM and ERP in direct combination with input and output management and with storage systems represent an important IT application sector for any company that has to manage structured and unstructured information."

### **About windream GmbH**

windream GmbH develops and distributes the windream ECM-system. windream GmbH currently employs about 50 people who are involved in development, partner and customer support, distribution and marketing. The company supports a network of about 250 distribution, integration and cooperation partners throughout Europe, the USA, South America as well as Australia and New Zealand. International enterprises such as John Deere, Bayer AG, Deutz AG, Dürr AG and König & Bauer are included among the company's customers.

### **About the windream Enterprise Content Management System**

windream, protected by worldwide patent since 2003, is counted amongst the leading solutions for acquiring, administering and archiving electronic documents in the office sector as well as in the field of SAP-integrated applications. windream is the first ECM-system anywhere which is completely integrated into the Windows Operating System.

The Standard Edition is generally used by smaller and medium-sized companies and the Business Edition by large enterprises. A whole variety of integrations extend the windream product portfolio. Integrations into ERP-, financial accounting, knowledge management, groupware and imaging / data capturing solutions as well as integrations into different branch-specific software systems are included among the product range. windream has achieved a first-class result as a participant in the BARC studies "Enterprise Content Management" in all test disciplines.
