“Come on App!“ – the CeBIT 2013

Visit us: March 5 to 9, Hall 3, Stand J 20

“Come on App!“ – under this slogan, we will be presenting new functions and extended mobile solutions for the windream ECM system at this year’s CeBIT from **March 5 to 9**, in **Hall 3, Stand J 20**. The exhibits will include a new windream app for mobile devices such as smartphones or tablets.

Economy goes mobile

The new windream app allows users mobile access to and the management of all data and documents stored to the windream ECM system: **anywhere and anytime!** This allows companies maximum flexibility for making important company knowledge available **for a shared use** by authorized users, regardless of the time and location. It also means that our presentation program stands in direct connection to the motto of this year’s CeBIT.

CeBIT Motto “Shareconomy“

The number of companies managing their entire knowledge via modern ECM systems continues to grow. The motto of this year’s CeBIT directly refers to this trend. “**Shareconomy**“ means the shared availability of information and their flexible use as a central economical **factor of success**.

All those who want to learn about the implementation of consistent, company-wide, digital workflows should visit us at our trade fair stand (**Hall 3, Stand J 20**) at the CeBIT 2013.

windream 5.5 • windream app • windream DirectStreaming • and much more...

Our ECM Highlights at the CeBIT 2013!

Many exciting novelties from our ECM portfolio will await visitors at the windream stand at this year’s CeBIT. The highlights include: windream 5.5, the windream app, windream DirectStreaming and much more ...

New features for windream 5.5

The windream version 5.5 has been extended by new features. For example, these include a PDF XChange integration for windream DocView. The windream search now offers a semantic search function. This feature offers users alternative search terms via a “Did you mean ...” function and a selection of documents similar to the items from the result list, sorted by their relevance. windream 5.5 now also supports the Microsoft Windows Server 2012, Windows 8 as an operating system and all Office 2013 applications.

Efficient VFS technology: windream DirectStreaming

The unique and patented VFS technology, which forms the basis for windream 5.5, allows users to manage data volumes of over four gigabytes. This is, for example, important for companies that want to use windream for the efficient management of large media archives with video and other media

formats, or for the management of data from digital devices. Unlike all other ECM systems, windream allows users to open these data directly from the application on a windream Server.

This DirectStreaming technology results in efficiency of time, a significantly reduced network load, and enormous enhancements of research operations across media archives. Such an increase in efficiency is only possible with the patented VFS technology, and comparable efficiency and speed cannot be found in any other ECM system.

The new windream app

The new windream app allows users to research documents stored on a windream Server via the fulltext. Furthermore, it allows users to mark favorites, to upload documents to the server or to access tasks and processes created and initiated via windream BPM.

The windream Web Portal and windream BPM 5

The windream Web Portal and the windream BPM Business Process Management system now come in a uniform design. The design is based on the layout of the Microsoft Office 2013 applications and of Windows 8. windream BPM now offers support

for rights to process designs and to the starting and administration of processes. The integration and use of tables have been further optimized; furthermore, windream BPM now offers an extended web scripting function, and supports parallel processes.

The windream Exchange e-mail archiving solution

The current version of the windream Exchange e-mail archiving solution supports Microsoft Exchange 2013. This is valid for both the Outlook Web Access (OWA) and for the client-based archiving of mails in Office 2013.

Further solutions at the windream stand

The exhibits to be presented by windream at the CeBIT also include the most recent version of an ECM solution for multi-function systems, produced by the windream partner Konica Minolta. And there's news from the SharePoint integrations: enhanced versions of the windream WebParts for SharePoint will be presented, containing, for example, a windream browser and efficient windream research applications.

For your CeBIT visit:

Tickets and appointments at windream.com/cebit

You want to visit the windream trade fair stand for your personal windream presentation? All customers and interested parties are cordially invited to make an individual appointment with our ECM experts.

You can order free tickets for your CeBIT visit via our homepage, at www.windream.com/cebit - and make your personal appointment for a discussion in your preferred time slot. The ticket codes will be sent to you via mail, quickly and conveniently. We are looking forward to your visit!

Join us at the windream stand

Konica Minolta • One Click Solutions • Scanfabrik • Athena • ABBYY

Our CeBIT presentation program will once again be complemented by the solutions and novelties of the co-exhibiting windream partners.

Next to **Konica Minolta** Business Solutions Deutschland GmbH from Langenhagen and the windream solutions provider **One Click Solutions** GmbH from Syrgenstein, **Scanfabrik** KG from Verl and, for the first time, **Athena Solutions** GmbH from Herne will join us at the CeBIT. **ABBYY** Europe GmbH, will also be participating once again.

windream International

Further guests: windream Switzerland • windream Benelux • windream Poland

Furthermore, we will welcome several international windream sales partners at our CeBIT stand!

We are happy to announce the participation of our Swiss distributor **KINETIC AG**, of our Dutch integration partner **ecmXperts** for the sales regions of Belgium, the Netherlands and Luxemburg, and of **Flashgate Ltd.**, representing the sales region of Poland. This is especially noteworthy since Poland is an official partner country of this year's CeBIT.

Pronobis presents:

SecuredLink for windream

Secure distribution of documents “without“ windream

Our Austrian windream distributor Pronobis from Vienna presents a new and very interesting tool. This tool, named “SecuredLink for windream“ allows the distribution of documents via e-mail, even to users without direct access to a windream

ECM system. As the name “SecuredLink“ already suggests, not the documents themselves, but links to them are sent per mail – completely encoded and secure. No chance for criminals and data thieves!

“SecuredLink“ makes the time-consuming generation of copies on further servers (e.g. FTP) and the creation of download links unnecessary. For example, the access to documents managed in the central windream ECM system can be embedded directly into a website. SecuredLink is, for example, ideal for sending customer information such as offers or order confirmations, brochures, presentations, technical documentations and guides, or even extensive user manuals.

tations, technical documentations and guides, or even extensive user manuals.

Security comes first

Release via the windream rights management

The possibilities for sending data via SecuredLink for windream can be managed via the default windream rights concept. For example, links can only be sent by users who are members of a group that possesses at least the reading right. The assignment can be carried out via the windream rights management – this allows flexible and detailed controls of the documents to be shared.

Encoded links guarantee that no public users will receive access to other windream documents. SecuredLinks can refer to a specific file version or always to the most recent version of a document. Validity dates allow a restriction of the access to certain time frames.

Transmittal Management for higher requirements

Convenient distribution of documents via the Windows explorer context menu

For higher requirements towards the distribution of documents, Pronobis offers a tool named “Transmittal Management for windream“. This tool allows the selection of entire document stocks to be sent to external users, including a version control feature. The transfer protocol – optionally the entire package – and all accesses, serving as receipt confirmations, can be archived to windream. All previously sent information, including their form, the time and the recipient, can be reconstructed at any time.

Important note for Kofax customers:

Price Adjustment for the PlusPac Assurance for Kofax Capture 8

After announcing the begin of sales operations and the support for the Kofax Capture version 8 for December 31, 2012, Kofax are now carrying out price adjustments for the PlusPac Assurance for Kofax Capture 8.

For all contracts to be extended from April 1, 2013, and including Kofax Capture 8, the costs for the PlusPac Assurance will increase from 20 to 24 percent of the list price.

Update and save money

For all customers to update to the current version 10, or to version 9, before the next charging date, the service fee will remain unchanged. If the update is made after the next charging date, the increased service fee will be charged for the current year of the contract. From the next charging

date forwards, the price of 20 percent will be charged. Without an update, the increased price of 24 percent will be charged.

Only for Kofax Capture 8

Please note that the price adjustment for the PlusPac Assurance concerns only those customers still using Kofax Capture 8. All other customers will remain unaffected by the changes.

New business alliance manager

Thomas Hartmann Joins the windream Sales Team

Support for our sales department: Since the beginning of this year, Thomas Hartmann has been active as a new windream business alliance manager. He is taking over his sales region from Klaus Zapatka, who retired at the end of 2012.

With his expert knowledge on sales operations in the ECM sector, Thomas Hartmann will be a competent contact person for our partners and customers, and for interested parties, especially in Western Germany. We wish him and his business partners a successful and friendly cooperation.

windream Trainings

Specific windream training sessions in English language will be held on request. For further information, please contact our partner management via partner@windream.com.
