## **windream GmbH draws a positive conclusion to this year's conference**

*The seventh edition of windreamCON was characterized by the merger into the dataglobal Group*

**Bochum. The seventh windreamCON, which recently ended, was again a complete success. The organizer, windream GmbH, welcomed numerous customers, interested parties and partners at the Vonovia Ruhrstadion in Bochum. This year's event focused on the merger to the dataglobal Group. In addition, the participants received a comprehensive outlook on the future strategy of the umbrella brand and the positioning of windream, which met with broad positive feedback.**

"At this year's windreamCON, we showed our existing customers and partners the common path into the future and clearly signaled to them that they can continue to work with their windream solutions as usual after the merger," reports Stephan Serger, Managing Director of windream GmbH, and adds: "In addition, we presented the new extended perspectives that will arise for us under the umbrella brand dataglobal Group. These will be reflected in our future solutions and services. In numerous discussions, the participants confirmed that, together with dataglobal GmbH and eleven cyber security GmbH, we are excellently equipped for the future under the umbrella brand dataglobal Group."

Stephan Serger, together with Dr. Christian Uhl, Managing Director of dataglobal Group GmbH, and Vice President Technology, Ulrich Jansen, highlighted the prospects, opportunities and synergies associated with the merger. The decades of experience and expertise of the three companies will be bundled in order to develop even more innovative solutions and combine these with services that are precisely tailored to customer requirements.

Specifically, this involves a new Solutions Suite in which the solution portfolios of the three companies will be brought together and continuously expanded. The solutions in the Solutions Suite can be used as ECM on-premise, as native cloud-based ECM services or in the hybrid version as "Hybrid ECM". Email security solutions round off the dataglobal Group's portfolio.

Furthermore, windream GmbH and its partners presented specific solutions, e.g. for digital document entry and incoming mail processing as well as the concrete workflow processing of travel expenses and requisitions.

"Despite the very technical topics, there was a relaxed atmosphere among the several hundred participants on site and in the online sessions of the hybrid event thanks to Michael Wurst - the cult stadium announcer of VfL Bochum, who led through the program in an amusing way. The show act by Hennes Bender, the 'Pottfather of German Comedy', also contributed to the fact that our guests had a lot of fun," concludes Stephan Serger.

windream has recorded all presentations with a video team on site and will publish them soon at the beginning of December.

### **About windream GmbH**

For 20 years, windream GmbH has been one of the top companies in the development and marketing of business software products for electronic archiving, digital document management and business process control or workflow automation. Above all, the company is nationally and internationally known for its ECM-system of the same name, windream. More than 100 employees and a worldwide network of about 250 sales, integration and cooperation partners take care of more than 2,600 customers with more than 260,000 workstations. The clientele includes nationally and internationally known and renowned companies such as the pharmaceutical group Roche, the media companies RTL Group and Heise Group, the Raiffeisen banks of Upper Austria, Tyrol, Carinthia as well as DFS Deutsche Flugsicherung and Rhenus Logistics.

### **About the windream Enterprise Content Management System**

With the patented integration into the Windows operating system, the foundation for today's windream ECM-system was laid more than 20 years ago. With this unique approach, windream sets new standards in terms of intuitive handling, inspiring usability and user acceptance also in the current version 8. All possible solutions, whether e-file, e-mail management, invoice receipt, incoming mail, scanning, archiving, search and find, business process automation, workflow and mobile working are modularly designed. windream is equally flexible when it comes to integrations into third-party products, e.g. ERP, merchandise management and financial accounting solutions. Thus, companies can configure the windream ECM-system like a construction kit exactly according to their specific requirements. With the Dynamic Workspace, the latest windream version 8 successfully bridges the gap towards mobility and cross-platform availability under an interface which can be designed by the user himself. No matter if in the office with a PC or a laptop, a Smartphone or a tablet: Any time, any place, any device. windream Dynamic Workspace is included in the windream Business Edition and does not need to be licensed as an additional module. windream - just use it
