windream successfully completes further SAP certification

Bochum. windream GmbH has had another completely newly developed integration solution for the SAP system certified by SAP. The now fourth SAP interface for the windream ECM-system named "windream Link 7 for SAP ILM" received the official certification "BC-ILM 3.1" (for SAP NetWeaver) and "S/4-BC-ILM 1.0" (for SAP S/4 HANA) after the successful execution of the SAP test scenarios.

A certification of windream products for SAP-applications exists continuously since 1994. The certificates issued by SAP refer to the current version 7.0 of the windream interface. This interface connects the windream ECM-system with specific SAP-applications in the field of electronic archiving and enterprise content management. With SAP ILM, it is possible to administer the life cycle of productive and archived data based on rules.

windream supports SAP-applications with comprehensive ECM-functions
windream GmbH is known for its high competence in the field of integrating ECM-solutions into SAP-applications. Already for years, the company has been offering a comprehensive portfolio in this sector, which includes the products "windream ArcLink", "windream DirectLink" and "windream Command for SAP". While windream ArcLink represents the connection between the SAP ArchiveLink interface and the windream ECM-system, windream DirectLink has especially been designed to allow post-indexing of documents which have been linked to SAP application documents. On the other hand, windream Command for SAP represents the command center via which the entire interaction between the windream ECM-system and the SAP-applications is configured and controlled.

About windream GmbH

For 20 years, windream GmbH has been one of the top companies in the development and marketing of business software products for electronic archiving, digital document management and business process control or workflow automation. Especially for its ECM-system windream of the same name, the company is known nationally and internationally. More than 100 employees and a worldwide network of about 250 sales, integration and cooperation partners take care of more than 2,600 customers with more than 260,000 workstations.

About the windream Enterprise Content Management System

With the patented integration into the Windows operating system, the foundation for today's windream ECM-system was laid more than 20 years ago. With this unique approach, windream sets new standards in terms of intuitive handling, inspiring usability and user acceptance also in the current version 7. All possible solutions, whether e-file, e-mail management, invoice receipt, incoming mail, scanning, archiving, search and find, business process automation, workflow and mobile working are modularly designed. windream is equally flexible when it comes to integrations into third-party products, e.g. ERP, merchandise management and financial accounting solutions. Thus, companies can configure the windream ECM-system like a construction kit exactly according to their specific requirements. With the Dynamic Workspace, the latest windream version 7 successfully bridges the gap towards mobility and cross-platform availability under an interface which can be designed by the user himself. No matter if in the office with a PC or a laptop, a Smartphone or a tablet: Any time, any place, any device. windream Dynamic Workspace is included in the windream Business Edition and does not need to be licensed as an additional module. windream - just use it!
