

Press release of October 05, 2021

Seamless interaction between Windows 11 and windream

windream users benefit from the new Windows 11 functions

Bochum. As of today, the Windows operating system version 11 is available for the first customers. As a long-standing Microsoft partner, windream GmbH had the opportunity to test the compatibility of its ECM-system with the new release in advance. The "stress test" did not prove any incompatibilities - on the contrary: windream users can work even more productively with Windows 11, as the new functions of the operating system are fully supported.

Recently edited documents in the start menu - also with windream

As one of the most important Windows innovations, recently edited documents will be displayed directly in the start menu. This also applies to all documents which have either been copied or moved into the folder structures of a windream system or which have been newly created there. Thus, it is possible to call up these documents listed as "recently edited" in the start menu directly there, too.

The guarantor for the complete compatibility of windream to Windows 11 is still the patented VFS-driver (VFS = Virtual File System), which is called VFS-X in the new function for the windream Dynamic Workspace. As a virtual file system, it allows saving documents on a windream drive which behaves like a normal network drive under Windows.

About windream GmbH

For 20 years, windream GmbH has been one of the top companies in the development and marketing of business software products for electronic archiving, digital document management and business process control or workflow automation. Above all, the company is nationally and internationally known for its ECM-system of the same name, windream. More than 100 employees and a worldwide network of about 250 sales, integration and cooperation partners take care of more than 2,600 customers with more than 260,000 workstations. The clientele includes nationally and internationally known and renowned companies such as the pharmaceutical groups Roche and CureVac, the media companies RTL Group and Heise Group, the Raiffeisen banks of Upper Austria, Tyrol, Carinthia as well as DFS Deutsche Flugsicherung and Rhenus Logistics.

About the windream Enterprise Content Management System

With the patented integration into the Windows operating system, the foundation for today's windream ECM-system was laid more than 20 years ago. With this unique approach, windream sets new standards in terms of intuitive handling, inspiring usability and user acceptance also in the current version 7. All possible solutions, whether e-file, e-mail management, invoice receipt, incoming mail, scanning, archiving, search and find, business process automation, workflow and mobile working are modularly designed. windream is equally flexible when it comes to integrations into third-party products, e.g. ERP, merchandise management and financial accounting solutions. Thus, companies can configure the windream ECM-system like a construction kit exactly according to their specific requirements. With the Dynamic Workspace, the latest windream version 7 successfully bridges the gap towards mobility and cross-platform availability under an interface which can be designed by the user himself. No matter if in the office with a PC or a laptop, a Smartphone or a tablet: Any time, any place, any device. windream Dynamic Workspace is included in the windream Business Edition and does not need to be licensed as an additional module. windream - just use it
