

Press release of December 09, 2021

Any time, any place, any device

windream Dynamic Workspace supports - besides the desktop world - also mobile devices

Bochum. windream GmbH has released the new free windream Dynamic Workspace App. This allows windream users to access documents from their smartphones or tablets, regardless of their location. The app seamlessly integrates functions of the terminal device, such as a camera. Thus, e.g. photos and scans can be uploaded directly into the windream enterprise content management system and stored there as image or PDF files. The native apps for Android and iOS offer the familiar look and feel of the respective ecosystems. Among other things, this includes the familiar navigation concepts, which leads to intuitive operation.

In the windream Dynamic Workspace, individual views can be generated which are visible in the app immediately after their creation and publication. For document retrieval, the windream Dynamic Workspace App includes a DMS-browser as a standard feature, as well as a context-sensitive search function which considers both the full text and the structured metadata of the documents. In the search results list, documents can be downloaded to the mobile repository for editing. Here, they can be edited offline, and uploaded back into the ECM system at a later time - optionally also as a new version of an existing document. With the integrated scan function, documents can be scanned on the go and then be uploaded via smartphone or tablet in the windream folder structure. Furthermore, users have access to their last edited documents in the windream ECM-system. Private favorites from My windream are also available with the windream Dynamic Workspace App, across platforms.

The respective versions of the windream Dynamic Workspace App can be downloaded for the DACH-region from the [Google Play Store](#) or from the [Apple App Store](#) free of charge.

The new windream Dynamic Workspace App briefly explained in the video:

About windream GmbH

For 20 years, windream GmbH has been one of the top companies in the development and marketing of business software products for electronic archiving, digital document management and business process control or workflow automation. Above all, the company is nationally and internationally known for its ECM-system of the same name, windream. More than 100 employees and a worldwide network of about 250 sales, integration and cooperation partners take care of more than 2,600 customers with more than 260,000 workstations. The clientele includes nationally and internationally known and renowned companies such as the pharmaceutical groups Roche and CureVac, the media companies RTL Group and Heise Group, the Raiffeisen banks of Upper Austria, Tyrol, Carinthia as well as DFS Deutsche Flugsicherung and Rhenus Logistics.

About the windream Enterprise Content Management System

With the patented integration into the Windows operating system, the foundation for today's windream ECM-system was laid more than 20 years ago. With this unique approach, windream sets new standards in terms of intuitive handling, inspiring usability and user acceptance also in the current version 7. All possible solutions, whether e-file, e-mail management, invoice receipt, incoming mail, scanning, archiving, search and find, business process automation, workflow and mobile working are modularly designed. windream is equally flexible when it comes to integrations into third-party products, e.g. ERP, merchandise management and financial accounting solutions. Thus, companies can configure the windream ECM-system like a construction kit exactly according to their specific requirements. With the Dynamic Workspace, the latest windream version 7 successfully bridges the gap towards mobility and cross-platform availability under an interface which can be designed by the user himself. No matter if in the office with a PC or a laptop, a Smartphone or a tablet: Any time, any place, any device. windream Dynamic Workspace is included in the windream Business Edition and does not need to be licensed as an additional module. windream - just use it
