

Press release of May 03, 2022

## **Digital construction file from windream at digitalBAU 2022**

**Bochum. At the digitalBAU trade fair, windream GmbH will present its solutions for digital document management in the construction industry. In particular, this includes digital files in various forms and here especially the digital construction file. The event will take place from 31 May to 2 June 2022 at the exhibition centre in Cologne. The windream stand is located in hall 4.2, number 508, where the integration partners ComputerLine GmbH, One Click Solutions GmbH and Dittrich+Kollegen GmbH will also be represented.**

With digitalBAU, Messe München has created a future-oriented format for the construction industry in cooperation with BVBS (Bundesverband Bausoftware). Planning offices, tradesmen's companies or investors will find special solutions on the subject of construction at the trade fair. The abolishment of paper files and the establishment of electronic workflows are among the core topics when it comes to digitalisation in the construction industry.

Already at the first event in 2020, windream's ECM-solutions met with great interest. Because while production in the construction industry in particular is often highly automated, there is just as often a need to catch up in administration. At this year's digitalBAU, windream will present specialist solutions for the digital transformation in the construction industry. This especially includes the digital construction file, with which companies can design their processes more efficiently and thus gain competitive advantages. With the industry solution, all documents - no matter if for single projects or trades - can be managed clearly. The documents are stored securely via access controls based on user roles or properties of the individual users.

Via the integrated construction diary, users can track project progress at any time. Thus, the windream construction file supports every phase of a construction project, from planning to implementation.

Furthermore, the co-exhibiting windream integration partners will be available for personal talks at digitalBAU. These are ComputerLine GmbH from Frankfurt am Main with a CRM integration into cobra, One Click Solutions GmbH from Bachhagel in Bavaria with their efficient incoming mail solutions, and Dittrich + Kollegen GmbH, who will present their special construction file based on the new windream Dynamic Workspace, which also enables mobile document access across locations.

Further information about digitalBAU is available on the Internet at [www.digital-bau.com](http://www.digital-bau.com) and from the windream GmbH homepage at [www.windream.com](http://www.windream.com) On request, windream GmbH will also provide interested trade fair visitors with free tickets.

**About windream GmbH**

For 20 years, windream GmbH has been one of the top companies in the development and marketing of business software products for electronic archiving, digital document management and business process control or workflow automation. Above all, the company is nationally and internationally known for its ECM-system of the same name, windream. More than 100 employees and a worldwide network of about 250 sales, integration and cooperation partners take care of more than 2,600 customers with more than 260,000 workstations. The clientele includes nationally and internationally known and renowned companies such as the pharmaceutical groups Roche and CureVac, the media companies RTL Group and Heise Group, the Raiffeisen banks of Upper Austria, Tyrol, Carinthia as well as DFS Deutsche Flugsicherung and Rhenus Logistics.

**About the windream Enterprise Content Management System**

With the patented integration into the Windows operating system, the foundation for today's windream ECM-system was laid more than 20 years ago. With this unique approach, windream sets new standards in terms of intuitive handling, inspiring usability and user acceptance also in the current version 7. All possible solutions, whether e-file, e-mail management, invoice receipt, incoming mail, scanning, archiving, search and find, business process automation, workflow and mobile working are modularly designed. windream is equally flexible when it comes to integrations into third-party products, e.g. ERP, merchandise management and financial accounting solutions. Thus, companies can configure the windream ECM-system like a construction kit exactly according to their specific requirements. With the Dynamic Workspace, the latest windream version 7 successfully bridges the gap towards mobility and cross-platform availability under an interface which can be designed by the user himself. No matter if in the office with a PC or a laptop, a Smartphone or a tablet: Any time, any place, any device. windream Dynamic Workspace is included in the windream Business Edition and does not need to be licensed as an additional module. windream - just use it
