01

Basics

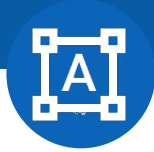

# Genky offers

**Platform independent**

Support of all platforms and device classes

**Easy to configure**

Creation of own applications

**quick implementation of user wishes**

Feedback from users can be implemented directly

**Easy administration**

Central administration of both the software and the configurations and authorizations

02

## Structure Genky

03

## Creating a View

# Modular system of possibilities

windream Genky offers you a modular system which enables you to configure your own applications.

In the future even more modules (components) will be made available to provide even more functions.

Connections to third-party systems or integration into third-party systems possible
