# Digital invoice processing -Invoice Management Pro-

How we manage digital invoice processing

Bochum, 11.21.2019, Speakers: Michael Benzler, Tom Marek

- O1 Intention
  From the idea to the solution
- Invoice Management
  Invoice verification process using windream BPM
- O3 Invoice Management PRO
  The conception of the new features
- O4 Live Demo

  The solution in practice

### Intention for the development of WMI Pro

- Experience from existing solution Invoice Management
- Shortening the implementation times of projects
- Developing a solution that offers more possibilities means:
  - to meet customer demands
  - Greater competitiveness
  - Faster handling of projects
  - Reduction of customizing costs
  - · Further customer spectrum can be covered

Less Follow-up costs!

Intention for the development of WMI Pro

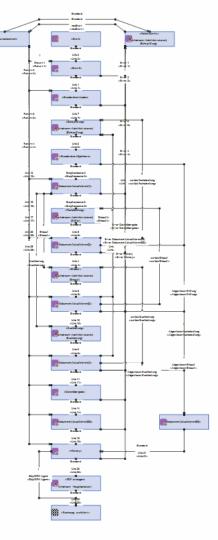

Learning from our projects

- Many ideas and requirements should already exist as options
- ✓ High service effort due to customizing (especially for changes of the existing solution Invoice Management)
- Other invoice variants must be covered (XInvoice, ZUGPFeRD)
- Special: Split postings/assignment table repeatedly requested

More functions!

Faster Project management!

### Invoice Management

Process flow of invoice verification using windream BPM

- Automated start by filing a document in windream (Task) in connection with a capture solution possible
- ✓ Visual inspection (validation of the document)
- Department-dependent technical audit/release (technical, content, e.g. by accounting)
- ✓ Further processing of invoice information (e.g. FiBu, interface to third party software)
- Continuous updating of the indexes (process and documents)
- ✓ Log history/progression
- Archiving

The conception of the new features
